

WATER RESOURCES

PRESENTED BY- ADWAITH VIJU
CLASS – IV A

Wait until night to water your lawn

Always use a pail when you wash the car

Turn off the faucet when you brush

Every leak wastes water- fix them

Rain barrels save water

ADVANTAGES OF SAVING WATER

WATER CONSERVATION ENCOMPASSES THE POLICIES, STRATEGIES AND ACTIVITIES TO MANAGE FRESH WATER AS A SUSTAINABLE RESOURCE, TO PROTECT THE WATER ENVIRONMENT, AND TO MEET CURRENT AND FUTURE HUMAN DEMAND. POPULATION, HOUSEHOLD SIZE AND GROWTH AND AFFLUENCE ALL AFFECT HOW MUCH WATER IS USED.

- ➔ CLEAN DRINKING WATER IS A VANISHING RESOURCE.
- ➔ WATER SAVED CREATES SMALLER WASTE LOADS IN SEWERS AND SEPTICS.
- ➔ WATER SAVED IS MONEY SAVED WITH SMALLER WATER AND SEWER COSTS.
- ➔ WATER SAVED IN HOT WATER HEATERS REDUCE FUEL BILLS.

THE THREE MAIN MEANS OF IRRIGATION USED IN INDIA

Canals

Wells

Tanks

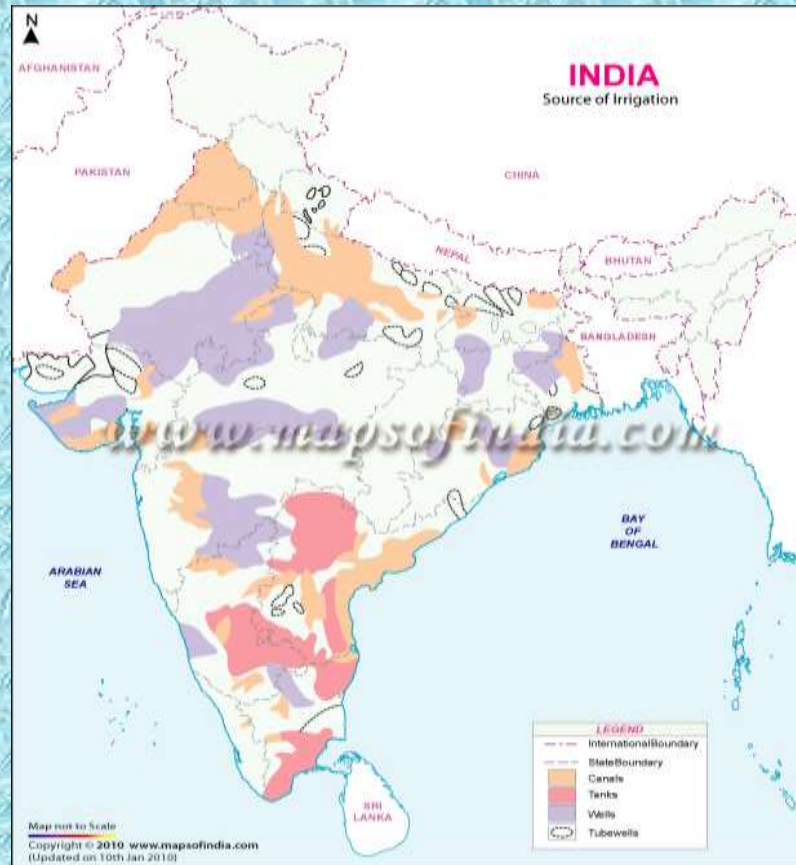

DAMS

A dam is a concrete structure built across the river to check the flow of water. A huge lake is created behind the dam.

MAP OF INDIA MEANS OF IRRIGATION

The background of the image is a dense, repeating pattern of small, glistening water droplets. The droplets are light blue and have a soft, out-of-focus appearance, creating a textured, refreshing effect. The overall color palette is a range of light blues, from pale to a slightly deeper shade where the droplets are more prominent.
