

## SEWA ACTIVITY

### **SAVE THE BIRDS SAVE YOURSELF**

**IF THEY ARE IN TROUBLE WE WILL SOON BE IN TROUBLE**

**Grade: IX CF**

**MENTORS NAME: SMITHA PRASAD**

### LEARNING OBJECTIVE:

- ✚ Understand the importance of protecting and feeding birds.
- ✚ Design bird feeders.

### COMPETENCE DEVELOPED:

- ✚ Global and environmental awareness
- ✚ Creativity

### SKILLS DEVELOPED

- ✚ Creativity
- ✚ Independent learning

### ACTIVITY NAME: MAKING BIRD FEEDER

Birds easily captivate spectators. Mesmerizing they are, from the view of the spectator they are to be beautiful creatures that can fly! Every soul ,dreams that one day they will be able to fly like a bird in the sky and the birds become role models inspiring each individual to take flight upon their journey.

To complete the SEWA activity the students of 9 CF took up an activity with theme that is close to the environment, bird feeder-an initiative to protect and feed birds in their natural environment. Each student individually made a house for the little birds who take up flight with difficulty. The students made feeders with sticks of ice cream, coconut shells, used bottles etc and identified a safe place to keep the bird feeders where birds are not disturbed by any factors. The birds showed hesitation to come and eat in the first two days of time. The project took its time and hard work from students to get it completed, but students showed great interest to complete the activity.

### **FEEDERS MADE BY THE STUDENTS:**

**MENTORS NOTE:**

The activity took the students to a very high level where the students started observing their surroundings, started feeding the birds on regular basis and observed birds in their natural environment.

**CONCLUSION:**

Through this creative activity the students came to know about the various living conditions of numerous birds. Since it is a common sight of birds dying due to severe heat and lack of food, this little shade and feeder might provide them with relief.
