

ABU DHABI INDIAN SCHOOL, BRANCH 1 – AL WATHBA

THE VALUE OF SCHOOL GARDEN

School garden is a wonderful way to use the schoolyard like a classroom that reconnects students with the nature. It teaches the true source of food, valuable gardening & agriculture concepts, and skills that integrate with several subjects (such as math, science, art, health, physical education, and social studies). It also enhances several educational goals, including personal and social responsibility.

(DRUMSTICKS)

Students of ADIS ALWATHBA, BRANCH 1, took the initiative to sell out the vegetables which were grown in school's front-

yard garden, and donated the fund collected to RED CRESENT towards charity. The school garden supplied vegetables, which were chemical free and nutrient rich.

This has established strong relationships between the school and the community.
